Description

CBD Mazar

The need for high quality CBD strains that are low in THC (<1%) is still increasing. Dutch Passion can hardly keep up with the demand for the industry's leading CBD strain, CBD Charlotte's Angel and have decided to add another member to the high-CBD low-THC cannabis seed collection.

Dutch Passion have crossed the sativa dominant, best selling CBD Charlotte's Angel with one of their most stable strains, namely the classic indica-dominant Mazar.

CBD Mazar is slightly lower in CBD than CBD Charlotte's Angel. CBD Mazar produces approximately 10-13% CBD, but THC content is always below 1%. On average CBD Mazar shows around 0.4-0.5% THC.

Because of the indica traits that have been bred into this medical variety, Dutch Passion reduced flowering time by a week compared to CBD Charlotte's Angel, so 8 weeks instead of 9. Outdoors she finishes at the end of September.

Production potential can be classified as 'Large'. Buds are hard and dense. The terpene profile leans towards the earthy, kushy and spicy side of the spectrum. As this plant is quite resinous, she can be used for extraction purposes and making oils.
