Description

100% autoflowering strain. This is a polyhybrid resulting from a cross between selected genetic lines of two of our purple flowered varieties:

????????? ?????: Devil Cream Auto

SWS38 (Dark Devil Auto) SWS37 (Black Cream Auto).

This strain shows a great hybrid vigour from germination as it is composed of a wide genetic mix.

This variety develops the typical structure of an Indica-Sativa hybrid, with a strong main stem, tough side branches and big leaves that end up forming a thick and dense main cola, surrounded by multiple buds on the side branches also with a good calibre and density. Devil Cream produces copious amounts of a very aromatic resin. The aroma is sweet and fruity with hints of incense and lemony citrus tones.

The plants grow quite tall for an autoflowering strain, a characteristic inherited from the Dark Devil Auto genes that intervene in the cross.

Some individuals can reach a height of more than one metre high, all this in just two months after the germination of the seeds. The resin of this plant has a potent and exciting effect.

Type
100% Autoflowering

Indoor
8 weeks from germination

Outdoor

Yield
350-600 gr/m²

Height
70-120 cm

THC

CBD

CBN
