??????? ?????Samsara Seeds

Description

Of medium height and producing good yields quickly, this is our easiest plant to grow.

It is the result of crossing AK47, one of the quickest flowering Sativas, with our excellent Northern Light, one of the three fundamental strains that have changed the world of cannabis culture over the last three decades.

This variety produces large foxtail buds with a very strong and slightly sugary aroma that means it won't go unnoticed.

A firm favourite among SamSara lovers for being so easy to grow, which is partly down to its Afghan genes which make it highly resistant to pests and mould, but also for its very strong, long-lasting and extremely pleasant effects.
