Description

Auto Lemon Kix

Auto Lemon Kix® is of Dutch Passion's best-selling autoflowering hybrids. She carries premium quality USA west-coast genetics. You may notice a certain sweet fruity scent similar to a famous USA brand of small colourful candies.

Auto Lemon Kix® was made after the genetics from the well known USA candy-scent variety were hybridised with Las Vegas Lemon Skunk. With two exceptional parents, Auto Lemon Kix® retains a very potent THC rich high. Yields are heavy and the skunk genetics ensure this is easy and undemanding to grow.

You can expect a rich and appealing fruity/skunky aroma, a sour citrus taste and a really powerful long lasting euphoric high. This is a variety that suits the grower looking for the latest and greatest USA genetics with guaranteed potency and an uncomplicated growing experience. Indoors she takes around 75 days from seed to harvest under 20 hours of daily light. Occasional heavy yielding phenotypes can take an extra week or two. Outdoors this variety takes around 100 days from seed to harvest.
