Description

Lennon Auto

Lennon comes from a selection of **Jack Herer** crossed with Haze.

This is a Sativa hybrid, very psychoactive and extremely strong. It may cause dizziness.

It has a lime flavor and incense aroma. It is a very productive plant. Buds are not very dense because of its haze genetics.

The non-auto version has a very complex feeding schedule and we grow it into low-nitrogen substrates. Watering either during growing or flowering should be adjusted to a PH range from 6.5 to 6.8.
