Description

Auto Pounder

Auto Pounder is an ideal choice for any commercial grower. Those who would not usually consider autoflowering varieties, yet would like the benefits an auto delivers. It was developed crossing high production Auto #1, with two of the highest yielding strains available today. Sensi's original Big Bud and the incredible yielding Power Plant. Under optimal conditions, it can produce over 1 pound (650g) per square meter.

Auto Pounder also maintains maximum flavour which is both sweet and fruity as well as excellent disease and pest resistance. To deliver such huge yields, it has a slightly larger stature than standard autos. It also has a very high flower to leaf ratio and greater height, usually around 80-100cm. It will finish in as little as 70-80 days from seed. This strain is considered very easy to grow and is an excellent choice for beginners as well as more experienced growers.

Even though this is one of Autoseeds largest producers, it still tastes outstanding. Rich earthy flavours are in abundance. Slightly sharper when heated directly, this brings out the more citrus tang from the big bud genetics.
