Description

Auto Zamaldelica

Compact, manageable and fast-flowering sativa, with excellent yields and very high THC levels for an autoflowering strain. It produces tight resinous buds with little leaf, with the complex and refined terpene profile of candy, tropical fruits, liquor, anise, musk and sweet carrots, and the intense euphoric and psychedelic psychoactivity that has made Zamaldelica world famous. Its sativa qualities, potency, complexity and duration will blow away even the most demanding sativa smokers, who will be left wondering how on earth a sativa effect of such caliber can come from an autoflowering strain.

If Zamaldelica has made a huge impact on the cannabis scene since its release a decade ago, enthroning her as one of the best sativas of recent times, we're sure that the autoflowering version of this super sativa will cause the same sensation, and will quickly establish itself as one of the best autoflowering sativa varieties available on the market.
