Description Big Bud has always been famous as a cannabis strain with staggering performance. Less known is the fact that her superior Indica pedigree has been carefully refined and steadily improved over the years. Plants that have its full flowering time will grow a little taller and are usually the heaviest-yielding examples. Big Bud's stems are thick and sturdy, yet the masses of giant, sweet, sparkling buds they produce can grow heavy enough to bend and even snap them, so the most promising branches should be supported with string or tensioned.
