Description Dark, delicious and devastating Black Domina spotted early in vegetation by rapid growth, black-green foliage and huge fan-shaped leaves, slightly elongated petals. Late flowering, a massive, sparkling, nearly-spherical central cola makes this phenotype unmistakable. Be warned, it has been observed that after the first meeting with Black Domina, many growers have begun to spend more time than usual in the

grow; and not for maintenance, but simply to enjoy the company of such exquisite ladies.
