Description

Blackberry Kush Auto

Blackberry Kush Auto is an automatic cross between Dutch Passion original Blueberry and a dark coloured resinous Kush hash-plant selected from our gene bank.

Blackberry Kush Auto has been introduced to offer a top quality indica with a heavy hitting stone together with a fresh fruity Kush taste.

The Blueberry may slightly, but not always, dominate the Kush characteristics giving a sweeter and fruity influence together with the strong earthy indica contribution from the Kush.

Blackberry Kush Auto grows vigorously with a strong main bloom and numerous side branches typical of an indica autofem.

The majority of plants will show colour in the leaves/buds at harvest, occasionally the hard and compact buds may develop particularly dark colours.

Blackberry Kush Auto typically reaches around 0.75 - 1 metre and is ready to harvest about 10 weeks after germination when grown on a 20/4 light cycle.

AutoBlackberry Kush will appeal to growers wanting premium quality genetics capable of delivering extra sticky XL harvests with a really strong body stone.

A visually beautiful automatic Kush which produces top quality effects together with great taste and aroma.

A superb new auto which has it all, highly recommended.

Type

100% Indica

Indoor

10 weeks

Height

75-100 cm
