### Description

CBD+ Critical #47

Our best Critical # 47 clone, high in THC (recessive), with a CBD Crew strain (dominant). As a result, plants are fast, strong, but not very tall, which maintain their well-known virtues: speed of flowering and great production, awarded in several glasses. It grows like a Sativa, but with dense buds typical of Indica. The use of stakes is recommended to support the weight of its vigorous flowers. It maintains its initial structure with similarities to Sativa, but already in flowering it will show its accelerated speed with dense and heavy flower clusters, as well as high branching and low internodal distance, so large plants will need pruning. Moderate sensitivity to fungi.

Mod. Culture: Indoor/ Outdoor

Phenotype: Sativa-indica

Genotype: CBD Strain X Critical 47

Flowering indoor: 50-55 days

Harvest outdoor H.North: End September

Harvest outdoor H.South: End march

Production indoor: 500 gr/m2

Production outdoor: 400-600 gr/plant

CBD: very high
