

CBD Kush

CBD Kush

A variety which will appeal to medical users looking for a CBD strain, but we also expect some recreational growers will be attracted to the strong body stone and the pleasurable and manageable high.

Description

CBD Kush

A variety produced in cooperation with the CBD Crew. CBD Kush is a CBD rich variety. Ratio of CBD:THC is between 1:1 and 4:1. Usually the CBD is present in greater quantities than THC. This variety was produced by crossing a THC rich Kandy Kush selection with a CBD dominant strain. The variety has a mix of indica and sativa genetics but the growth pattern generally shows an indica dominant appearance with good yields and a satisfying flavour. Plants generally reach around 100cm tall.

This is a variety which will appeal to medical users looking for a CBD strain, but we also expect some recreational growers will be attracted to the strong body stone and the pleasurable and manageable high.
