Description

CBD Skunk Haze

CBD Skunk Haze comes from a project between Dutch Passion and CBD Crew.

The goal was to achieve an optimum ratio of 1:1 THC:CBD. For medical use low %THC is preferred for some medical patients who want a relaxing and high quality genuine cannabis effect without the intensity that some high THC varieties give.

Recreational users find that high CBD levels give a very comfortable and smooth high without anxiety or paranoia. CBD Skunk Haze contains 5% THC and 5% CBD. To create this variety our Haze/Skunk (winner of the 1992 High Times Cannabis Cup) was carefully crossed with a high CBD variety. CBD Skunk Haze produces large tall plants.

This Sativa/Indica cross (50/50) produces large buds which are not too dense.

The aroma and taste are of spicy cedar wood alongside tones of citrus, pine and mint. CBD Skunk Haze grows well Indoors and in a greenhouse. The flowering period is approximately 10 weeks and yields up to 450 grams/m2 are possible under ideal conditions.
