Description

## Cream Caramel CBD

CBD-rich version of one of the most appreciated strains from the Sweet Seeds® catalog, our Cream Caramel® (SWS04).

Cream Caramel CBD® (SWS67) is the result of the cross between our Cream Caramel® and a selected CBD-rich clone from Diesel ancestors.

The THC:CBD ratio of Cream Caramel CBD® stands between 1:1 and 1:2, making it a strain rich in CBD (Cannabidiol).

This strain presents a mostly Indica plant structure with a big main cola and generous development of side branches, showing a strong main stem and large secondary branches.

The tastes and aromas of this strain are sweet as candies, with a background of earthy tones and fresh hints of cypress and citrus.
