Description

Crystal Candy

This strain was developed within a special program of the Sweet Seeds Department focused on the search for curious, exquisite and subtle sweet aromas that evoke aromatic sensations of candy shop. The aroma of this strain is sweet and fruity, with tones of chewing gum and fruit jellies, mixed with hints of acid strawberry and mature melon. This strain is a big producer of aromatic resin crystals that completely cover the flowers and their surrounding leaves with a very high density of long, large-headed trichomes. The plants look like indica-sativa polyhybrids, very vigorous and productive, with big buds and long side branches.
