Description

Diesel Auto

This powerful, automatic flowering Diesel hybrid can go from 0 to 60 grams in only 60 days. This strain is a hybrid of the classic New York City Diesel crossed with the awesome Lowryder #2.

Diesel Automatic offers the well-known and much-loved taste and aroma of the New York City Diesel while offering quicker harvests thanks to the autoflowering genetics gained from its Lowryder #2 parent. Like all the newer autoflowering hybrids, it has an improved yield and better flavour compared to many of the original autoflowering strains. It is a fast and powerful strain (good growers can expect 110 grams per plant) and takes around 8 weeks for the whole growth cycle.

This means it can grow almost anywhere, and is ideal for small grow tents, cupboards or guerrilla grows outdoors. It normally grows to a height of around 50 to 70 cm indoors, but can grow larger if given space or grown outdoors. Diesel Automatic has a strong odour, so please keep this in mind if growing in more discreet conditions. Its flavour is mainly the chemical, fuel-like diesel taste but not quite as overpowering.

There is also a slight citrus aroma in the buds. If you like New York City Diesel but don't have the time, space or ability to grow it – then Diesel Automatic is the perfect strain for you.
