Description

Gorila

Chem Sis x Sour Dubb

This American genetics has one of the highest THC levels on the market. Its resin production is so big that it soaks even the leaves and stems, making it perfect for extractions.

Its smoke has an exquisite flavor with earthy and sweet nuances, a little acid and with a touch of pine inherited from its progenitors. It has an intense aroma of pine wood and bitter lemon.

Its combined effect between Indica and Sativa causes a cheerful euphoria followed by a pleasant relaxation, allowing the body to float while the mind remains clear.
