Description

## Killer Kush F1 Fast Version Sweet seeds

---

Feminized and **photoperiod-dependent** version of one of the most famous strains from the West Coast of **USA**, developed around the year of 1994 in Sunset Beach, South California, the Ocean Grow Kush, better known as OG Kush.

With an **ultra-fast flowering**, our **Killer Kush F1 Fast Version®** is the resulting hybrid from the cross between a selected 3<sup>rd</sup> Generation autoflowering genetic line leaning to the indica side and an elite clone of OG Kush.

The result is an extremely potent plant with a very fast flowering. This strain produces large and aromatic buds, all covered by a thick layer of resin. The aroma is sweet, citric and acid with exotic tones reminiscent of aromas from the **Chemdawg-Diesel family**.
