## Over Dawg Medical Seeds

---

Over Dawg is the fruit of two mythical USA strains: OG Kush and Sour Diesel, which conceive a plant with dense branching and a strong structure to hold the weight of its big buds. When grown indoors we do not recommend to keep more than 16 plants per meter due to the plants robust and wide structure. The plant can easily produce more than 550 gr per square meter making it worthwhile yield wise. In an outdoors setting it will also produce large yields, because of its bush like structure, trimming the larger leaves is recommended to assure direct sunlight on secondary branches with buds. The aroma and flavor have strong citric hints that reminisce of fresh passion fruit, grapefruit and humid earthy tones. This plant comes with a potent punch, it has a long lasting sensorial and corporal high that can alter your perception, not recommended for the THC sensible or for activities requiring concentration. Suitable as a complement when treating muscle pains and for personal meditation retreats.

60% sativa - 40% indica

THC: 20% - ratio thc/cbd: 1:0

Indoor vegetative period: 1-2 weeks

Indoor flowering period: 9 weeks

Indoor yield/m2: 550 gr

Outdoor height: 1-2 m

Outdoor harvest: end september-early october

Exterior yield/plant: + 1 kg

Genotype: Og Kush x Sour Diesel
