Description

Recovery CBD

The Recovery CBD is the plant with the highest CBD content of our catalog, being able to reach up to 21% of CBD in optimal growing conditions and with a THC of 0.15%-0.30%. It is a new crossing of our Medical CBD pot Therapy CBD, in order to increase to the maximum the CBD content. Its flowering is fast, around 60 days. As for the terpene profile, it has a combination of fruity aromas with a more earthy finish. Thanks to its very high percentage of CBD its effect is not psychoactive, but maintains the "therapeutic" effects without associated side effects such as red eyes, dry mouth, psychedelic effect, etc.. For this reason it is an ideal plant to make from tinctures to butters, creams, oils, etc.

50% Indica 50% Sativa (feminized)

THC: 0.15% to 0.3% - CBD: 14% to 21%.

Indoor vegetative period: 1-2 weeks

Flowering period indoor: 8 weeks

Production indoor/m2: 450gr

Height outdoor: 1.5 - 2 meters

Harvest outdoor: End of September - beginning of October

Outdoor yield/plant: 900 gr.

Genotype: Medical CBD x Therapy CBD
