Description

Strawberry Blue Early Harviest

WOS decided to launch our Early Harvest line, varieties of fast flowering, feminized and photodependent, to the market. These are the result of the crossing of an autoflowering F4 with photodependent varieties of our catalog, significantly shortening its flowering and strengthening its vegetative growth stage, turning them into ultra fast varieties.

These plants being early version can be ready for harvest, in flower in as little as 45 days total.

Which makes them ideal for crops in humid, rainy and very hard winters- since their speed allows you to anticipate the attacks of the most fungi and beat the fall rains!
