Description

SugarMill

Gorilla Glue #4 X Wedding Cake

When growing SugarMill you will find your self thinking how is it possible for a flower to have such a sweet sugary flavor. She is a fantastic yielding plant with a solid center kola along with great lateral branching. She is an extremely easy to clone plant. You will want to top her and train her to really get her to grow out sideways. By doing this you are creating a very full plant whose yields will be very nice and solid. You can easily train her to yield even more due to her heritage and structure.

Her smell and taste is a perfect blend of vanilla/citrus with a creamy citrus hash rounded off with a nice and complex subtle mint undertone. Leaving your palate with a nice crisp, yet pungent taste that is long lasting from her exotic flavor. Expect the extracts to be some of the most fragrant you have tried due to her highly exotic terpene profile.

Flower time

65 - 70 days

Yield

250 - 300 g/m²
