Description

Using the autoflowering genetics that gave rise to Low Ryder, we crossed these with one of our best Black Domina mothers then re-crossed

them to preserve their autoflowering properties.

This variety retains intact the organoleptic qualities of the Domina, including its distinctive aroma that we all recognise and adore so much.

It will grow for approximately 12 days after which it will enter a fast flowering cycle. Supersonic Crystal Storm will produce excellent results 65 days after germination.

Grown indoors with a 20/4 photoperiod and in a big enough plant pot for proper root zone development, yields per plant can reach 45g, rising to 75g if grown outdoors.
