#### Description

##### **Sweet CBD Auto**

This outstanding strain has been 3 years in development, crossing and refining a non psychoactive, pure CBD photoperiod mother with our Auto Pounder. This led to increased yields and gave stability to the ruderalis line. Sweet CBD Auto gives you all the therapeutic benefits of CBD including anti-inflammatory and anti-spasmodic properties making it perfect for medical users. Recreational users also love this strain as it means you can go about your day in a completely normal fashion whilst still feeling the calming ease that cannabidiol brings.

Sweet CBD Auto will grow short, topping out between 80-100cm in most setups. The classic indica shaped leaves and close branch distances make it very easy to manage and perfect for areas where space and discretion is key.

As a producer this plant will yield between 80-100g per plant in a good setup, or 400g/m<sup>2</sup> in a SOG setup, which although not quite as high as some, the sheer quantity of CBD produced more than makes up for it.

The classic citrus aromas are there in abundance, but they definitely lean more towards the tropical/Orange flavours, with very little acidity coming through in the smell or the taste. It's terpenes make for a very satisfying experience regardless of how you choose to ingest it.
