### Description

White Lemon is a very balanced cross, expressing the best qualities of both parents. The El Niño lineage is very clear in the leaf shape and the size and density of the buds. The Super Lemon Haze heritage is all in the branching, smell, taste, and in the shape of the calyx. The White

Lemon grows medium-short internodes, but keeps growing quite a bit after switching to 12/12 for flowering. The branches grow very strong and can support large colas. Medium nutrients levels will do great with this strain, which performs outstandingly in all mediums, indoors or outdoors. Cuttings from mother plants root very fast and easily, making this a great strain for propagation once the mothers are selected from seeds. The buds are long, dense, with large calyx and long hairs. Already after 4-5 weeks of flowering the smell gets citrus-like, and skunky. It is not as hazy as the Super Lemon Haze, but it is extremely lemony. The effect onset is a bit of a creeper, taking time to peak and then staying up there for a long while. It is a complex, well balanced high and stoned feeling. Its medicinal use has not been fully evaluated yet. Type 50% Sativa, 50% Indica Indoor 8-9 weeks flowering time Outdoor 9 weeks flowering time Yield 900 gr / m2 Height Medium THC% CBD% CBN%
