Description

Y Griega CBD 2.0

After years of selection work and crosses with our Y Griega CBD, we have achieved a plant with a very high CBD content and a THC below 0.3%.

Thanks to the crosses with the famous Cherry Wine CBD genetics we have achieved that all the offspring have this characteristic. This makes it an ideal plant for all those users who want to use it as an adjunct to a therapeutic treatment.

Due to its low levels of THC, it is suitable for all types of people, including the elderly and people who have no prior tolerance or have never had contact with it.

The psychoactive effect it has is practically null, which makes it perfect to consume orally, either through tinctures, butter, vegetable oils, etc.

At a structural level, it is similar to Y Griega CBD, although it improves its production at a general level, both in flowers and in resin.

At the level of aroma and flavor, it continues to have a clear citrus predominance, but this time with small hints of sweet, sour wine.

To achieve its maximum organoleptic performance, we recommend growing it with organic products.

Characteristics:

Genetics: indica 50% / sativa 50%

THC: Low - CBD: High

Indoor vegetative period: 3-4 weeks

Indoor flowering period: 9-10 weeks

Indoor production / m2: 450 gr

Outdoor height: 2 meters

Harvest outdoors: mid-October

Outdoor production / plant: +600 gr

Genotype: Y Griega CBD x Cherry Wine CBD
