Description

Zombie Kush

From the selection of one of our first genetic search works, an old Lavender Kush clone was pollinated by our brilliant Amnesia.

From there a clone that we named "Sideral" was selected and we decided to pollinate it again later with our Bubba Kush.

Its vegetative cycle should be generous if we want to develop the full potential of its Indica demeanor.

With a low EC both in the vegetative and the flowering cycles we will get spectacular results.

Its purplish colour scheme and the great quantity of trichomes that cover its large flowers would make this strain a key one for Kush flavor lovers.
