Description

Auto Kryptonite

We took several phenotypes of the Granada Mountains and crossed them with our varieties to find a plant more narcotic and with a stronger effect.

The outcome is this strain of fast flowering.

This plant has median appearance with long thin buds, but it is very compact and heavy.

It has a deep green color that is becoming clearer as the flowering progresses.

It has a touch of acid haze because of its crossing with Yumbolt.

Probably the fastest Sativa in the world.
